## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Election/Restrictions***

Applicant's election of species A in Paper No. 13 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Contrary to applicant's response, only claims 1, 2, 5, 6/1,2, 7/5, 8/1,2,5, 9/1,2,5, 10, 11, 12 and 15 read on the elected species. Accordingly claims 3, 4, 6/3,4, 8/3,4, 9/3,4, 13, 14, 16 and 17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected.

***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The title should include that an analysis is preformed to determine if a price or quote is valid.

***Claim Rejections - 35 USC § 112***

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 7 cannot be dependent from itself. As such its dependency is unclear.

Art Unit: 3679

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5, 6/1,2, 12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenberg (US 6,363,357). Rosenberg discloses a management system and method for Internet transactions wherein a quote/price is validated (column 7, line 51-53). Through a Web page, a program (header 202) is transmitted to a receiving terminal associated with a product to be purchased. The program is then returned wherein its contents, including price, are validated using the same calculations in order to ensure it has not been tampered with (column 7, paragraph beginning line 16). The program is not specifically stated as being a calculation program. However, price calculation programs are notoriously well known and Rosenberg indicates that "the price and any other relevant data" (column 6, line 23) may be included. Thus it would have been obvious at the time the invention was made for the skilled artisan to include a calculation program depending on the particular application.

Claims 7/5, 8/1,2,5, 9/1,2,5, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenberg as applied to claims 1, 2 and 5 above, and further in view of McAuliffe (US 5,838,790). Rosenberg does not disclose any details as to what

Art Unit: 3679

is the result when tampering is detected. McAuliffe discloses a tamper detection program wherein once tampering is detected it is communicated and logged. At the time the invention was made, it would have been obvious for one of ordinary skill in the art to provide the method/system of Rosenberg with a tamper detection program as disclosed in McAuliffe in order to monitor any tampering. The various methods/systems or monitoring any tampering are well know and would have been implemented depending upon the particular application of the tamper detection program.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Flemming Saether whose telephone number is 703-308-0182. The examiner can normally be reached on Monday through Friday.
